

POLITICS & TECHNOLOGY

Spring 2026

Instructor:	Mary Lind	Time:	MW 1:30 – 3:00
Email:	mlind@binghamton.edu	Place:	Lecture Hall 005
Office Hours:	W&TH 10:00-12:00 or by appt.	Office:	LNG 77

Overview: Twenty-first century technologies have fundamentally changed the political landscape both globally and domestically. This course will provide an overview of some of the most pressing technological issues of interest to political scientists, including cyber conflict and cooperation, information warfare and social media, artificial intelligence, and digital repression.

Learning Outcomes: This course fulfills the ‘N’ (social science) requirement for Harpur College’s General Education requirements. This requires that you are able to “[describe major concepts and theories in at least one discipline in the social sciences and demonstrate an understanding of the methods social scientists use to explore social phenomena.](#)”

To pursue these outcomes, in this class, students will:

- Be introduced to recent political science literature on topics related to cyber conflict, digital repression, artificial intelligence, and more
- Discuss the ways in which political scientists operationalize & study concepts related to technology
- Apply course topics to current events by engaging with content from news organizations, inter-governmental organizations, and civil society organizations

By the end of this course, students will:

- Have an understanding of how modern technology affects international and domestic politics
- Be able to effectively analyze and evaluate the utility of different sources of information on the topics
- Have well-formed opinions on the role that technology should play in politics today

Office Hours: I will hold regularly scheduled office hours on Wednesdays and Thursdays from 10am-12pm. **Please email me ahead of time if you plan on coming by so that I can adequately prepare for our meeting.** If you are unable to meet during those times, email me and we can try to find another time. Office hours will be in-person in my office in LNG 77 (library basement) unless stated otherwise.

Communicating:

- **Email:** I will do my best to answer emails within 24 hours if received during the week, and within 48 hours if received over the weekend, on a holiday, or during a university-wide break. If it has been more than three business days since you sent your message and you have not received a reply, please email me again.
- **Brightspace:** I will be posting regular announcements on Brightspace. As such, I expect you to check the page for this course regularly so that you remain up-to-date.

Materials: You do not have to purchase anything for this course. Most readings will be made available to you on Brightspace or linked directly in the syllabus. If a reading has not been posted on Brightspace, you can almost certainly find it through the library. You may also find it useful to become a paid subscriber to [Wired](#), [Reuters](#), or another well-respected news organization like [The Washington Post](#), but **this is not required**. If you need to access a news article that is behind a paywall for this class, email me and I will see what I can do.

Grade breakdown:

- Current events analysis: **60%** (3 at 20% each)
- Midterm: **20%**
- Final: **20%**

Letter grades:

A	94 & above
A-	90-93
B+	87-89
B	84-86
B-	80-83
C+	77-79
C	74-76
C-	70-73
D	60-70
F	59 & below

Current events analysis (20%): Instructions will be posted on Brightspace within the next week.

Grade dispute policy: If you think you have received a grade that is unfair, you may dispute it with me by sending me a written explanation (at least one paragraph, but no more than one page) as to why you think you deserve a higher grade. I will read it and schedule a meeting with you to discuss my decision to either keep the grade the same, raise it, or lower it. That grade will be final. I will not consider grade disputes raised more than one week after the original grade was posted.*

Academic Honesty: I take plagiarism and academic honesty very, very seriously. You are expected to abide by Harpur College's [Student Academic Honesty Code](#); any violations will result in a report being

*Based on Dr. Amanda Licht's policy from PLSC 117.

made to the Harpur College Academic Honesty Committee. **Regarding the use of AI:** If you plan on using AI to complete your assignments for this class, please drop it. You will not learn by using AI to do your assignments for you nor will it do a good job on them; it is not worth it. If you use AI for ANY PURPOSE to assist with any assignment in this course, you must say so in your references page and say what you used it for. If you use AI to help edit/proofread an assignment, for example, I will also ask to see the version that you wrote before running it through AI in addition to the final version. If you have questions at any point regarding what constitutes an academic honesty violation or improper use of AI, **please ask me!**

Students with Disabilities: Binghamton University is committed to the creation of an inclusive and safe learning environment for all students, including students with disabilities. Services for Students with Disabilities (SSD) is responsible for the determination of appropriate accommodations for students who encounter barriers due to disability. Request your academic accommodation letter(s) early in the semester, or as soon as you have completed the SSD process (self-disclosure form, submitted documentation and initial appointment), so that we have adequate time to arrange your approved academic accommodations. Remember that accommodations are not retroactive, and a discussion with your instructor must occur regarding their implementation. Your access in this course is important to me. If you experience any disability-related access barriers in this course, such as with printed content, graphics, online materials, classroom seating or location, or any communication barriers; reach out to me and SSD right away. You can contact SSD at 607-777-2686 or via email at ssd@binghamton.edu.
